

Hello World Form App

Hello World Form App

Before the Button is Clicked

No output....

Hello World Form App

After The button is clicked

- The first button (btnHelloButtonTest) doesn't do anything when you click it. It has no action associated with it.
- The second button (btnClickHereButton) is more interesting.
- When you click this button, it changes the text displayed on a label (lblHelloworldLabel) to say "Hello World."
